LS ELECTRIC creates the core automation solutions for the fields ranging from production facilities to information systems.

It is the device and software operable using a designed screen for users to monitor and control the operating status of given facilities and equipments.

Windows CE platform based XGT panel is a user-friendly solution, providing convenient, clear and realistic display, prompt data transmission and processing as well as easy environments.

Based on the advanced technologies, LS ELECTRIC satisfies various requirements of clients, from unit facilities to advanced industrial fields, leading the HMI market.

HVAC

MONITOR

15

High functioning, user friendly and robust choiec for your system, iXP2

Durability

- Slim and durable design with aluminum frame and a reinforced glass
- IP66 Certification with enhanced waterproofing and protection against dust.

- Dual Monitor function clone/extended mode
- Multi-touch setting to prevent malfunction

Connectivity

- Various external interfaces to provide IoT solutions
- Ethernet 2ch., HDMI/Audio output, USB host/device, multimedia (video)

- Same as iXP panel cut that can be replaced
- Depending on touch sensitivity, you can set it up with bare hands or gloves.

Responsive touch screen

- Touch sensitivity is improved by applying responsive touch screen.
- Use touch screen either with bare hands or with gloves.
- Various types of touch setting function can be used according to user's work environment

Dual-Core CPU offers high-speed communication and processing

High luminance/resolution LCD with an LED backlight and 24 bit colors to express clear and vivid colors of 16,777,216.

XGT Panel **IXP Series** *intelligent XGT Panel*

Convenient control with a single touch!

A user-oriented interface, enhanced performance, and soft and quick screen switching and respond speed to touch! Meet iXP series of LS ELECTRIC that genuinely and fully connects humans with equipments.

It is highly competitive using the user-friendly technologies.

Quick screen switching and response speed to touch
 16.7M TFT colored LCD

Large drawing / backup memory (Drawing-128MB, Backup-1MB)
 Sound Output support

- Various interfaces
 - USB Host 3ch (Front: 1, Rear: 2), Device 1ch (Front)
 - SD card
- Various communication drivers provided

■ Presence sensor applied (within 1m)

High Speed

High-performance 1GHz CPU is installed to improve the data and screen switching speed, and Windows CE 6.0 OS is adopted to execute NET-based external applications.

Large Memory

Large device memory is provided to save mass data.

Presence Sensor

Sensor detects movement within 1m, to control the backlight, ensuring a longer life of the product.

More Colorful

High luminance/resolution LCD with an LED backlight and 24 bit colors to express clear and vivid colors of 16,777,216.

Customize

- Put your company's brand on the front of HMI (inquire of your sales person about minimum order quantity condition).
- Purchase only hardware of HMI minus monitoring software if you do not need it (.NET Framework 3.5 included).

XGT Panel **EXP Series** *efficient XGT Panel*

Effective Control and Monitoring Solution Cost-Efficient eXP!

- ∋ Simple Design
- ∋ 4.3", 7" and 10.2" wide-screen sizes TFT color LCD
- Wide variety of communication interfaces
 - 2~3-channel serial communication
 - Ethernet

- Large memory for drawing (64MB)
- RTC function (maintained by battery)
- Convenient downloading/uploading
- of drawings via USB port in the front

Higher Level of Performance

Gives superior performance with improved CPU compared with the existing products

Wider Variety of Communication Interfaces

Communicable simultaneously with PLC, barcode reader, VFD, temperature controller

Slimmer and Lighter in Weight

20% lighter than previous products, provides more space and lightens user's panels

Customize

Put your company's brand on the front of HMI (inquire of your sales person about minimum order quantity condition).

Window CE-based new HMI developed with advanced technologies of LS ELECTRIC to optimize the user experience

iXP2 Multi-touch and gesture-control screens

Multi-touch maximizes operating stability and safety. Use gesture-control to view logging trend graphs and to change screens.

Reinforced protection against water and dust. Conforms to NEMA 4X standard.

iXP2 One to one interchangeability with existing iXP series

Offers equivalent panel cut to iXP.

iXP2 Screen gesture

Flick to change screens. No extra switching button is needed to change screens.

iXP2 Object gesture

Select the object you want and then swipe and flick it. Object list

• Logging trend graph • View logging history • View history alarms

iXP2 Multi-touch

Use multi-touch to protect your system from undesired errors.

iXP2 Dual monitor mode and extension mode

Increase your convenience by duplicating or extending your screens.

* Extension display mode scheduled for release in '18.09

Hardware Related Functions **iXP**

Presence Sensor (Detects the body movement within 1m) Option VM Module Card Connector Connector SD Card 15 AUDIO OUT USB Host 1ch USB(HOST) RS-422/485 (Connected to a USB memory, mouse and keyboard) 10BASE-T/100BASE-TX RS-232C USB 2.0 Device

iXP 1 Respective Front USB Host/Device Channel

- An additional USB host channel is installed in the front panel.
- A front USB host is used to connect to a USB memory, mouse and keyboard.
- A front USB device port is used to change the XP-Runtime without opening a control panel or download/upload the drawing file created using XP-Builder.
- USB cable: USB-301A 2.0

(Upload/Download of drawing)

iXP Sound Output Function (For all iXP models)

- The sound files (wav, mp3) registered using XP-Builder can be output to speakers connected to HMI.
- An alarm is generated via speakers to warn operators.
- Up to 512 sound files can be saved.

iXP Function to use SD Cards

iXP supports additional SD memory cards along with previous USB memory to diversify the backup means.

iXP Presence Sensor

- The XP presence sensor detects movement within 1m to turn on a backlight.
 When not used, it turns OFF the screen to maintain a longer lifespan of the backlight.

Hardware Related Functions **eXP**

eXP USB Port in the Front for Devices

- With USB port in the front, no need to open the control panel to apply changes to XP-Runtime or download/upload drawing files made in XP-Builder
- USB cable: USB-301A 2.0

eXP 3-Channel Serial Communication

- Simultaneously communicable by RS-485, RS-232C, RS-422/485
- D-Sub 9-pin terminal includes COM1 and COM2

eXP RTC Function

- RTC (Real Time Clock) function operates with a battery even with the power off
- HMI time setting is adjustable quickly using XP-Builder

eXP High Performance

• About 30% better performance

Hardware Related Functions iXP2 iXP eXP

Ethernet method for Quick Transmission of Mass Data

- Ethernet method has improved the transmission speed. Compared to the conventional RS-232C method, a quicker transmission speed: 115kbps \rightarrow 10/100Mbps
- Regardless of the memory capacity, the drawing files can be quickly uploaded/ downloaded, and logging/alarm/recipe data can be conveniently used.
- Ethernet method is used for various production data collection, monitoring and control using PC.

Barcode Scanner Communication

- ASCII data imported by accessing a barcode scanner from XGT Panel can be saved in the user-assigned PLC or XGT Panel's internal memory.
- Complete Bit can be randomly saved. It allows users to check whether the XGT Panel has read the data without errors.
- Communication with barcodes is possible by using the RS-232C interface installed in the XGT Panel.

Providing Various Communication Channels

Using RS-232C, RS-422/485 and Ethernet, XP/eXP and iXP2/iXP are capable of communicating with up to 4 and 6 types of controllers, respectively. Refer to the system block diagram (TTE type does not have an Ethernet module).

XP-Builder

XGT Panel offers easy and user-friendly multi-interface.

XP-Builder Functions

Animation function

- When GIF format is used, animation effects can be realized depending on the state of given bit.
- When a video clip on given site is created into GIF to be added to a drawing screen, more accurate information can
- be delivered to users. (Video clip files can be created using the commercial software for GIF creation)

Drawing Editor: XP-Builder

Project Window

Add, delete and edit project property, logging, recipe and alarm conveniently.

Data Element Window

- Displays the objects on a screen currently shown.
- When double-clicked, a window on setting the properties appears.

Screen Window

Add, delete and edit basic screens, window screens and part screens easily

Output Window

Displays the error checked on drawing data and the search results.
It displays the specific description of the errors created.

Tag function

- Users can set device address by desired name, which can be used in an object.
- When a set device is tagged to an object, addresses can be changed, collectively
- Up to 10,000 tags can be registered.

Various fonts with convenient setting options

- · Windows fonts used in a PC can be transmitted to HMI for use.
- When using Windows fonts, font attributes (Italic, bold and underline) can be used as well.
- Various font sizes including True Type are supported.
- · Supports the Unicode, characters of other countries such as the standard font and high-quality fonts are beautifully displayed.
- · Sophisticated and elegant text can be used to create a screen using various fonts. Arial : ABCDEFGHIJKLMNOPQRSTUVWXYZ Book : ABCDEFGHIJKLMNOPQRSTUVWXYZ Impact : ABCDEFGHIJKLMNOPQRSTUVWKYZ
 - 가나다라마바사아자차카타파하
 - Helvetica : ABCDEFGHIJKLMNOPQRSTUVWXYZ Tahoma : ABCDEFGHIJKLMNOPQRSTUVWXYZ Time : ABCDEFGHIJKLMNOPQRSTUVWXYZ Verdana : ABCDEFGHIJKLMNOPQRSTUVWXYZ

가나다라마바사아자차카타파하 가나다라마바사아자차카타파하 가나다라마바사아자차카타파하

User-oriented screen UI

Providing a flexible script language

- Provides a screen UI that can be easily used considering user's experiences.
- · Divided into categories so that a graphic library can be easily searched.
- Various graphic libraries are offered for enhanced usability.

Property Window

This function enables users to change properties of numerous objects at once, so that users do not have to open each object like a button or a lamp for modification.

- Numerous objects on the screen can be selected at once to replace the pictures, enhancing users' convenience.
- When modifying several objects, only the objects with the same function should be selected.
- Users can correct both pictures and properties.

Tool Box

Used to select an object or draw a shape.

Library Window

- Library is divided by category for easier use, and preview is used for drawing.
- Convenient for users to register and delete the Library.
- Drag & Drop is used for a screen insertion.

Software Related Functions

Multi-lingual support & conversion to respond to the global enterprise environments

- In response to enterprise environment of global era, up to 12 languages can be simultaneously converted and users can select a language depending on his/her nationality.
- When desired character string is registered in a table, a language can be converted into a device value and switched upon operation.
- The languages supported include Korean, English, Chinese (PRC/Taiwan), Japanese, French, Turkish, Iranian (Persian), German, Greek, Russian, Italian, Norwegian, Polish, Portuguese and Spanish, all of which are supported in Windows.

XP80-TTA LSIS:xGK(CPU)

Strict control management using security setting

- Upon PLC control using objects like a switch or an input method editor, only the authorized users can perform controls depending on the set security level.
- It supports 10 security levels in total, and the password of a sublevel can be accessed using the password of a main level.
- When the security level is authorized, a session is disconnected after a certain period of time, asking for the password again.

Free and easy moving of parts

- The fixed values and the parts related to the word device are selected/ switched to be displayed on a screen, and the images registered as the given parts can be used.
- A mouse is used to set the movement points for free moves, linear moves, and moves based on the XY coordinates, which can be chosen by users.

Automatic registration of a character string table

This function enables the character string input by users in the objects to be automatically registered.

- When the file created using a single language is to be changed to a character string table for the purpose of multi-lingual support, it can be automatically registered to the character string table without inconvenience of users.
- All the static strings used in objects can be registered in the character string table.
- Up to 10,001 character strings can be added to a character string table, and the name of a new character string table and the editing languages can be set and registered by users.

Memo pad function

Function to create or save a short message by selecting various pen thicknesses and colors on XGT Panel.

- It is useful in exchanging messages between operators working in turns.
- The user chooses the thickness and color of the pen and writes on a screen in order to input the message.
- Such memo can be saved in a CF card or a USB memory, and the data are archived even when the power is turned off.
- Users touch the screen and drag to create a memo.
- When creating a memo, users can UNDO/REDO the memo, the thickness/color of a pen can be changed, and a specific memo or all memos can be deleted.

PI RIW

Advanced Functions

Alarm Function

History Alarm

The history of alarms can be saved in the device to check the description of occurrence.

The alarm can be categorized into up to 8 upper and 8 lower class groups or an alarm list, and an alarm explorer can display only the group alarms the user may desire. When a screen on description to check the details of alarms generated is registered, the detailed screen window linked to the alarm will appear.

(It can be used to check the measures or detailed description when an alarm is generated.)

Flow Alarm

The alarm generated is displayed on the upper/mid/lower section for users to promptly take actions.

Flow alarm can be set to be operable at a specific screen, so it can be used to deliver the information on equipments and company.

System Alarm

When a serious fault or a trouble of HMI occurs, the system alarm informs the users, which is a critical function.

E-mail Function

- It offers a function to send backup files (.csv) using the E-mail address registered upon backup of the logging and alarm data in XGT Panel.
- The E-mail function for logging can only send the backup files of the group desired for each logging group.
- The E-mail function for history alarm includes a function to send to the E-mail only on the alarm messages to the designated receivers when the user-assigned alarm is generated or recovered.
- The logging and alarm backup files sent can be easily analyzed in PC using a program like EXCEL.

Logging Function

- It offers a cyclic logging that is repeated depending on the time and device state and a conditional logging which works under the device conditions.
- Up to 32 logging areas (conditions) can be provided, and the maximum size of an area can be set up to 512Kbyte, 100DWord.
- Up to 512Kbyte, 100DWord (64Bit upon bit logging) per logging can be saved.
- Basically, logging is saved in the built-in SRAM(512Kbyte, 100DWord), and the backup of logging is available using the CF card, SD card, USB memory stick or USB external hard disk.
- Logging data can be viewed in XGT Panel using a logging view object, and they can be converted into a CSV format to be easily edited using a PC via software such as EXCEL.

Encryption of Logging/Alarm Backup Files

- The backup file format can be archived as binary files to prevent the data from being damaged or manipulated.
- The encrypted files can be converted into CSV files using a CSV file converter offered from XP-Builder.

Able to View PDF

- Viewing PDF file XGT Panel
- Saving trouble shooting instructions for failures (alarm) in PDF format so that users could see in the field
- No number limit of PDF files as PDF files are saved in external memories
- This function is available only in iXP2/iXP series HMIs, not in XP series HMIs

Scheduler

- Scheduler assigns an operation to be executed on a set time.
- Available functions include Bit ON/OFF, setting Word values and a script operation. Each scheduler can assign up to 8 operations.
- Up to 32 schedulers can be set.

Recipe

- After the data to be written on PLC are created, the data values created on a PLC device continuously connected to a specific device can be written.
- It can read a lot of device values from the PLC continuously connected to a specific device.
- Basic recipe can register up to 10000 Word/DWord devices and 255 table blocks.
- Recipe data are saved in a non-volatile memory of XGT Panel. Thus, when the power is out, the data saved at the last minute are kept.
- Recipe data can be registered and edited using a XGT Panel or an EXCEL program.

Script

Providing a flexible script language

- It is difficult to perform drawing using only the provided object functions, and it can be supplemented using a script.
- A structured language similar to the C language is used for user's convenience.
- The script using complicated arithmetic operations and various functions is executed to greatly reduce the load upon external controllers.
- A validity check of the grammar on the created scripts is available.

Various uses of scripts

- A wide range of scripts including global scripts, screen scripts and object scripts can be used depending on the usage.
- A global script operates according to ON/OFF of the device assigned, regardless of the screen operation, and a special device can be used for scripts in a regular basis.
- An object script can perform operational management of the object devices.
- A script can run when a screen opens or closes.

Mounting Flexibility

- All iXP2/iXP series models and eXP20 can be mounted in portrait or landscape mode as per user's needs and preference.
- Configurable in project property menu.

Operation Logging

- TTA models of XP Series and all iXP2/iXP models can save logs of your operation in touch screen.
- Use saved logs to check system's operation or errors.

Link with Controllers

Convenient Simulator

Offline simulation

- Without XGT Panel, the drawing data can be directly viewed from PC.
- Devices can be monitored using a PC, and values can be directly input to check operations.
- A simulator is used to check the operations just like the XGT Panel. Before transmitting the drawing data to HMI, data errors and abnormal operations can be checked.

Path-through(XP-VSP)

When XGT Panel is connected to PLC with serial, PLC ladder program can be modified using the internal Ethernet.

- Users no longer have to change the cable for PLC program modification, or to go to the PLC for changes.
- A program can be modified even when a control panel is far away.

Note) XP-VSP user manual reference

Manufacturers	Supported Drives
LS ELECTRIC	ALL LS ELECTRIC PLC CPU
LSELECTRIC	XGI/K Series Link(Only Remote-1 Connection)
Omron Corporation	CS/CJ Host Link Serial
YASKAWA	MEMOBUS RTU Master

Able to Link with PLC Simulator

- Controlling and monitoring testing in PC linking XP-Builder (XP-Simulator) and PLC simulator
- Linking with LS ELECTRIC PLC simulator and XG5000 simulator
- Linking with SIEMENS PLC simulator and S7-PLCSIM (S7-PLCSIM v5.4 or above)
- Linking with Rockwell Automation PLC simulator and RSLogix Emulate 5000 Controller (v21.00.00 or above)
- Linking with Mitsubishi PLC simulator and GX Simulator (GX Simulator v7.30 or above)

Using XGT PLC for batch-registration of devices (tag function)

The variable names used in the PLC program that is created using XG5000 are automatically registered in XP-Builder, so that they can be used in drawings.

- [Save as a Variable/Description File] of XG5000 is used to first save the variable names used as CSV files.
- Using [Import XG5000 Symbols] from the [Tag] item of XP-Builder, an automatic registration via tags is possible (Array variables supported).
- Without changing the memory address, the variables used in the PLC program can be used.

Communication Options

Fieldbus option provided

Various Fieldbus communications using the XGT Panel options

(RAPIEnet, Profibus-DP and CANopen Slave offered)

RAPIEnet(XPO-EIMT) twisted-pair ring system diagram

XP-Server Function

The data required from the production site's XGT Panel can be directly collected or saved in a PC. It has several roles including a mutual data exchange between several XGT Panels, or sending an E-mail or connecting to a Database.

- It connects to the Database via PC to save, inquire and manage the XGT Panel data.
- When a trigger condition is generated, users will be informed via data E-mail of PC.
- When a trigger condition is generated, it imports or writes the screen capture, logging, alarm and recipe data of a specific XGT Panel.
- It is possible to collect various information including production outputs and causes of errors and failures from the XGT Panel to the DB server

External Monitoring Function

× Only the Ethernet-support models can use the function.

XP-Remote

- An XGT Panel screen can be monitored and controlled remotely with a PC.
- Up to 4 PCs can remote-access to a single XGT Panel. (Only one PC can access XP-VNC.)
- Remote PC control of XGT Panels can be authorized or restricted (When not authorized, it is impossible to control with the Remote PC).
- There is a synchronization mode and a non-synchronization mode, which allows users to monitor the XGT Panel and the Remote PC screen under the same or different conditions.

Web Server

- The screen currently viewed on a XGT Panel can be viewed on a web browser via Internet.
- It is accessible in any place where Internet is connected.
- It can be connected to multiple Internet Explorers. (Impossible to access the XP screen at the same time)
- It is possible to upload the logging and alarm backup files as csv files in the XGT Panel.
- It is possible to restrict access of specific users or groups.
- ** The functions described above are available when a Web Server Program is installed to the XGT Panel using XP-Manager.

XP-VNC

- The screen currently shown in the XGT Panel can be viewed from the user's PC.
- Several XGT Panels can be monitored and controlled with one PC.
- After inserting the IP of XGT Panel to be accessed from XP-VNC
- (S/W for PC), the current screen of the XGT Panel can be monitored and controlled.
- It is possible to restrict PC control when the XGT Panel is under operation on site (VNC interlock device provided).

VNC Client

- All iXP2/iXP series models can be shown screen of another PC or HMI in your HMI.
- To view another PC's screen, install universal VNC server (Ultra VNC, Real VNC and so on).
- To view another HMI's screen, download VNC server to your HMI using XP-Manager.
- Add "VNC Viewer" object in your HMI project.

System Block Diagram

1:1 Serial/Ethernet Communication

N: 1 Serial Communication

One controller to multiple XGT Panels (serial)

- X Up to 16 XGT Panels can be connected, but the speed for screen refreshing varies according to the number of panels.
- ※ Connection available only to specific controllers (limited to PLCs)

Simultaneous Connection with Multiple Controllers

4 kinds of controllers to one XGT Panel

- Without the RS-422/485 and RS-232C, up to 4 controllers can be connected using only Ethernet.
- % When it comes to iXP2/iXP, up to 16 controllers can be connected.

1: N Serial Communication (Multi Drop)

Multiple controllers to one XGT Panel

% When 1:N communication is applied, the same types of controllers should be used.

N:1 Ethernet Communication

One controller to multiple XGT Panels (Ethernet) X According to the controller type, the number of XGT Panels connected may vary.

N:M Ethernet Communication

Multiple controllers to multiple XGT Panels

Our Solution

We are leaping as a global leader beyond the top enterprise in Korea in the field of automation solutions.

The LS ELECTRIC HMI solutions incorporate the core H/W and S/W technologies and services, which are optimized for client's environments at various industrial sites, ranging from unit machines to massive process control.

iXP2 Series

- Aluminum body frame, responsive touch screen.
- Easy-to-use Multi-touch, gesture, dual screen, portrait mode.
- Multi connected with 1Gbits 2ch. Ethernet between PC to PLC.
- Various interfaces : USB host /device, SD card, HDMI.
- High resolution : 1024 X 768
- IP66, UL type 4x, NEMA 4x standards
- Explosion proof. IECEx, ATEX, KCs

iXP Series

High-resolution and performance

- 1GHz high-performing CPU & quick screen refreshing speed
- 16,777,216. TFT color (24bit) support & high-luminance/resolution LCD
- Mass internal memory (User memory: 128MB, Data backup: 1MB)

User-oriented simple environment

- Various storage interfaces (USB/SD)
- Movement detection (presence sensor) system

[Unit: mm]

Safety Instructions

- · For your safety, please read user's manual thoroughly before operating.
- Contact the nearest authorized service facility for examination, repair, or adjustment.
- Please contact qualified service technician when you need maintenance.
 Do not disassemble or repair by yourself!
- Any maintenance and inspection shall be performed by the personnel having expertise concerned.

According to The WEEE Directive, please do not discard the device with your household waste.
