SWITCHES WITHOUT COMPROMISES.

Katko is a Finnish family business specialising in safety switches, load break switches and fused switches with more than 70 years of experience. Not all safety and load break switches on the market come from specialised manufacturers by any means, and that is precisely why we are so proud of ours. We design and manufacture every product ourselves in our own factories. The challenging Finnish climate creates a basis for developing switches that work in all conditions across the globe. Switches without compromises. This is what we at Katko think, as did the generations before us.

ROBOTICS AND HANDWORK. THE BEST OF BOTH WORLDS.

We manufacture all of our safety switches, load break switches, fused switches and terminal blocks in our own production plants in Finland and Poland. A high level of automation is part of Katko's DNA that ensures a consistent quality level in our products. Katko's flexible and adaptive production philosophy even facilitates the manufacture of smaller batches in a competitive manner. Furthermore, we can provide our customers with more tailored products, and we are ready to do so. This is where Katko's motivated and professional staff come in. We employ approximately 120 people, two thirds of whom are in Finland.

Taking care of people and the environment are among the most important values of our family business. Our environmental thinking is guided by factors such as efficient raw material use, energy-efficient production and the quality and life-cycle of the end product. All of the materials used in our production processes are 100% recyclable. sales office was opened in Dubai in 2007. Today, Katko products are sold in more than 60 countries on all continents.

FOOD INDUSTRY

Food processing. Dairy.

Meat packing & processing. Beverage-making.

KATKO KER switches can withstand pressurised water, steam and chemical detergents in locations that require a high level of hygiene. Katko's selection provides you with a range of acid-proof products for most food and pharmaceutical industry applications.

CLEAN AIR

Air conditioning.

Warm air.

Whether we are talking about cooling or heating, Katko provides an extensive selection of products suitable for demanding air conditioning from ORs to work safety for all industries. The UV protected plastics and aluminium enclosed switches can withstand demanding climate conditions and provide a reliable solution for applications ranging from air-based heat pumps to industrial cooling equipment.

HEAVY INDUSTRY

Metal Industry. Pulp. Paper.

Mechanical durability and the conditions of the most demanding places of use guide your safety switch choice, but we are not just talking about one product. Katko's strength lies in an extensive selection that covers the needs of an entire plant from 10 to 1600 A. With Katko, you get products that are quick to install and modified to suit your requirements. Save time in both construction projects and maintenance shutdowns.

HAZARDOUS AND DEMANDING AREAS

Mining. Oil. Gas. Fire. Marine.

Katko will switch electricity on and off in demanding and hazardous conditions as well. Our selection includes products such as ATEX certified switches for dusty environments, Rina and Lloyd's classified products for the maritime industry, and high temperature resistant solutions complying with the EN 12101-3 standard.

POWER DISTRIBUTION

Standard panel. Switchgear. Distribution boards.

Switchboard and switchgear manufacturers appreciate Katko's technician-friendly products and accessories, as well as the products' reliability and usability. Whether for a residential apartment, a property or an industrial plant, we provide an extensive selection of safety and fused switches, cable connectors and terminal blocks for 400–690 V low voltage grids.

RENEWABLE ENERGY

Photovoltaics. Wind power. Recycling.

Solar power is the energy of the future. Solar panels produce DC power, and switching it off is an art in itself. The Katko PV switch product series has been developed for this purpose. In addition to DC power, the products are designed to withstand strong UV radiation and other challenging outdoor conditions.

SWITCHES ACCORDING TO IEC 60 947-3.

SWITCH

A mechanical switching device capable of making, carrying and breaking currents under normal circuit conditions which may include specified operating overload conditions and also carrying for a specified time currents under specified abnormal circuit conditions such as those of short circuit.

Note: A switch may be capable of making, but not breaking, short-circuit currents.

DISCONNECTOR

A mechanical switching device which, in the open position, complies with the requirements specified for the isolating function.

Disconnecter: (working definition) device without on-load making and breaking capacity.

SWITCH DISCONNECTOR / LOAD BREAK SWITCH

A switch capable of making, carrying and breaking currents under normal circuit conditions and which, in the open position, complies with the isolating requirements specified for a disconnector.

SWITCH DISCONNECTOR FUSE

A switch-disconnector in which one or more poles have a fuse in series in a composite unit.

UTILIZATION CATEGORY

Utilization category	Use / Application
AC-20	Connecting and disconnecting under no-load.
AC-21	Switching of resistive loads including moderate overloads
AC-22	Switching of mixed loads, inductive and resistive loads including moderate overloads
AC-23	Switching of motor loads or other highly inductive loads

PROTECTION AGAINST OVERVOLTAGE

U_{imp} (Impulse withstand voltage) defines the device's use in abnormal network conditions with overvoltage due to lightning on overhead wires etc.

This characteristic also defines the device's dielectric quality. Overvoltage protection is ensured by choosing the equipment according to U_{imp} . The 4 impulse withstand categories of use at 400V/ 690V (IEC 60 364-4-44) are:

Category	U_{imp}	Applications
1	2,5 kV	specially protected equipment
2	4 kV	Portable tools, motors, etc.
3	6 kV	Equipment placed in distribution networks
4	8 kV	Equipment placed at the head of an installation.

The U_{imp} rating for most of the Katko switches is 8kV.

INSTALLATION ENVIRONMENT TEMPERATURE

To assure the best of operation of KATKO switches the ambient air temperature of installation environment should be in the range of -40°C to + 60°C.

When the ambient temperatures exceed +40°C, the maximum load of the switch may have to be derated. Please contact KATKO for assistance.

CONDITIONS OF SALE

1. Validity

These conditions are subject to any special stipulations set out by KATKO Oy (hereinafter “Katko”) in the Agreement documents. The said conditions and stipulations shall prevail unless otherwise agreed in writing.

2. Specifications

All quotations for goods are made in accordance with Katko’s specifications at the time of order.

3. Price

Katko reserves the right to undertake reasonable price adjustments in case of fluctuation of cost with two (2) months notice (unless otherwise agreed in written). The adjustment will be applied also to orders already received and confirmed, if the confirmed delivery time is longer than two (2) months. Any change of the prices shall be notified to the Distributor by registered letter, fax or e-mail.

4. Delivery

Unless otherwise agreed, deliveries shall be ex-works, Vantaa in accordance with Incoterms 2010. Where the Distributor fails to give Katko adequate instructions for dispatch, or otherwise delays delivery, Katko shall be entitled to store, dispose of or reallocate the goods without being responsible for any loss and at its option to charge for any costs arising and/or to cancel the order.

5. Force Major

Katko shall not be under any liability in respect of any delay in delivery arising from Force Major including but not limited to industrial or labour disputes, riots, mobs, fires, floods, wars, civil strife, embargoes, shortages of labour, materials, power, fuels, or means of transportation, whether affecting the Company or any subcontractor, or for circumstances caused by reasons of law, regulations or orders and lack of permission of any government or competent Authority. Any delay caused by such conditions shall be excused and Katko may claim extension of time for as long as such conditions continue. During the period in which delivery of the goods cannot be made for any above-mentioned reason the Distributor shall be entitled, after giving Katko written notice of its intention to do so, to purchase elsewhere at his own cost and risk and Katko shall not be obliged to make up deficiencies which have arisen as aforesaid. If a delay exceeds three months Katko and the Distributor may cancel the Agreement without incurring any liability therefor.

6. Payment

a. Unless otherwise agreed, the Distributor shall make full payment in Euro to Katko by confirmed and irrevocable documentary credit (L/C) payable at sight in Helsinki.

b. Katko charges interest for late payment, amounting to one and one half per cent (1 and 1/2%) per month for any unpaid amount from the date such payment is due.

7. Claims

No claim for shortage or damage will be considered unless received in writing by Katko within 14 days from receipt of the goods at their destination.

8. Guarantee

Katko shall at its option replace at its own cost any goods which on arrival, fail or are found defective, provided that the goods are returned to Katko’s designated factory freight prepaid, and Katko is informed

immediately, the failure or the defect becomes apparent and the same is shown to Katko’s reasonable satisfaction to be due to its faulty workmanship or defective materials.

No other warranties, express or implied, are made or will be deemed to have been made by Katko and Katko neither assumes nor authorises any other person to assume for it any other obligations or liabilities in connection with the distribution and sale of the products or otherwise. This condition shall replace and exclude all common law or statutory warranties, undertakings, statements, representations or conditions whether express or implied. Katko shall not be liable in contract or tort for any indirect, consequential or economic loss (whether relating to quality, despatch, and delivery or otherwise).

The Distributor will assume responsibility for and hold and save Katko harmless from all claims (including but not limited to claims resulting from acts of negligence on the part of the Distributor), liabilities, demand, costs or expenses or the like which may be incurred. The Distributor shall maintain during the term of this Agreement adequate insurance to cover its obligations under these conditions.

9. Copyright and confidentiality

The copyright in all Katko documents (including drawings and art work) furnished to the Distributor shall at all times remain vested in Katko and neither the documents nor their contents shall be used without Katko’s express written consent for any purpose other than that for which they were furnished.

10. Taxes, duties, fees, charges

The quoted price is exclusive of all taxes, duties and fees and charges of any kind in the country of destination. Such taxes, duties, fees and charges are payable by the Distributor.

11. Forbearance

Katko’s rights shall not be affected or restricted by any indulgence or forbearance to the Distributor.

12. Orgalime S 2000

Orgalime S 2000 “General Conditions for the Supply of Mechanical, Electrical and Electronic products” (hereafter Orgalime S 2000) shall apply if not otherwise agreed in the Agreement documents or determined in these conditions.
